Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 14 contains the trademark/trade name SU-8. Where a trademark or trade name is used in a claim as a limitation to identify or describe a particular material or product, the claim does not comply with the requirements of 35 U.S.C. 112, second paragraph. See *Ex parte Simpson*, 218 USPQ 1020 (Bd. App. 1982). The claim scope is uncertain since the trademark or trade name cannot be used properly to identify any particular material or product. A trademark or trade name is used to identify a source of goods, and not the goods themselves. Thus, a trademark or trade name does not identify or describe the goods associated with the trademark or trade name. In the present case, the trademark/trade name is used to identify/describe a type of photoresist and, accordingly, the identification/description is indefinite.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation

under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 11-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Smela, et al ("Smela")(US 6,103,399) in view of Khoury, et al. ("Khoury")(US 6,452,407B2).

Smela discloses a method for making microstructures comprising the steps of depositing a release layer, which may be aluminum(col. 1, lines 7-15 and col. 2, lines 1-5), depositing and patterning metal layers, removing the release layer to release the microstructure(col. 10, lines 28-45). Smela also discloses that the microstructure can be patterned by deposition through a mask(col. 10, lines 57-64 and col. 11, lines 1-40).

Smela is silent with respect to the details of the steps of deposition through a mask.

Khoury is relied upon for its teaching of the steps in the method of deposition through a mask. Khoury discloses the deposition of a seed layer(col. 7, lines 10-15),

Art Unit: 2825

the deposition of a photoresist layer and the patterning of the layer(col. 7, lines 33-46), plating of metal(col. 7, lines 44-47).

One of ordinary skill in the art would have been motivated to have combined the teachings of Khoury with those of Smela because Smela discloses that the deposition through a mask may be used in the process taught by Smela.

Allowable Subject Matter

Claims 1-10 and 21-30 are allowed.

The prior art of record does not teach or suggest the claimed method of removing a spring contact and bonding a replacement spring contact.
